

The Claims

1. A screen for keeping an insect or other contaminant out of a can of the type having a flip up top and sealing member, comprising:

a preformed screen member affixed to the inside of a can top and sealingly attached to the periphery of the opening, the screen being concave to form a pocket over the opening to allow the opening sealing member to move downward.

2. A screen for keeping an insect or other contaminant out of a pull tab beverage can comprising:

an expandable screen member affixed to the underside of the opening member of a pull tab beverage can, said screen expanding downward into the inside of the can so as to permit the can to be opened while covering the opening of the can and preventing stinging insects and other debris from entering the can.
